PROJECTS

DMS(Demand moduling Studio), 249 Days

DMS (Demand Moduling studio) is mostly used by data scientists. Through which they can perform experiments on very complex data with ease. It provides automated cluster management for scaling computing resources based on workload demands.

Varikko, 92 Days

Varikko is a project in which users come and ask questions related to their queries and other users can give the answers. It basically provides a forum in which customers interact with each other related to their product queries.
